Attention: Residents on West Mill Street

RE: Road Construction Update

The new concrete items will be completed this week on the north side of the street.

Next week we will begin work on the south side of the street.

Traffic will continue to travel only toward the west, but the travel area will be on the new stone between the orange drums and the new concrete curb on the north side of the street.

We will excavate and place stone base on the south portion of the project. New concrete curbs, driveway approaches, and sidewalks will follow the stone installation.

During this time, residents on the south side of the street will have limited access to your driveway. The new concrete requires a two-week curing time before it can be driven on. Please plan to park on a side street during this time period.

When the concrete work is completed, then the asphalt paving will begin.

Thanks again for your cooperation throughout this work.
